

About Us

Transforming Organizations with Talent and Technology

TECKpert connects public sector organizations with the tech talent, services, and technologies needed to address modern challenges and drive secure operational efficiency. Our expertise spans IT staff augmentation, software modernization, and digital transformation, providing agencies with the tools to enhance their capabilities, secure critical infrastructure, and achieve mission-critical objectives. By integrating innovative technologies around AI, we help government agencies modernize workflows, improve efficiency, and secure their infrastructure and applications while navigating the complexities of today's digital landscape.

Services

Where Modernization and Innovation Meet to Drive Mission Success

IT Staff Augmentation

At TECKpert, we recognize that securing the right talent is essential for government agencies to achieve their mission-critical objectives. Through our IT Staff Augmentation services, we streamline the process of recruiting, vetting, and managing skilled IT professionals for short and long-term projects.

Software Development & DevSecOps

We offer a dynamic solution tailored to the unique needs of government agencies at state and local levels. Our in-house teams specialize in executing software development projects with precision and efficiency, leveraging our internal staffing capabilities to assemble the ideal teams for each project.

Website Design and Development

We utilize WordPress VIP to build new websites from the ground up, modernize existing websites, expand capabilities through systems integration, and migrate from unsecure platforms. WordPress VIP is a FedRamp certified Content Management System.

AI Enabled Software Modernization

ModSafe™ is TECKpert's AI enabled Software Modernization solution. Our remediation team utilizes AI to scan your code repository for deficiencies and vulnerabilities from CVEs. Code is written and pushed to the repository automatically reducing remediation time by 90%.

Why TECKpert?

We utilize 100% **US-based talent** for all our projects ensuring high-quality, dependable, and secure services.

TECKpert employs **agile methodologies**, allowing us to be flexible and responsive to project requirements.

We take a **client-centric** approach to prioritize our clients' needs, goals, and requirements to deliver tailored solutions.

We have established strong partnerships with **leading technology** providers, giving us access to the latest tools and platforms.

Key Achievements

Successfully delivering **IT Staff Augmentation** services across multiple contracts for state and local agencies in Florida, with a combined contract ceiling exceeding \$300 million.

Led the assessment and implementation of the design for the **Digital Transformation** for two Florida municipalities.

Provided **Software DevOps** for local Florida county using **Microsoft PowerApps**, Power Automate, and SharePoint to streamline workflows and enhance team collaboration.

Built a web services application framework using AWS (Cognito, RDS, Lambda) with NodeJS, React, and C#, providing **DevSecOps** for a private firm's public facing internet portal.

Created an **AI** tool for used to source and match talent to client requirements.
